

Instructions for Running New Asset Master Record Report: S_ALR_87012037

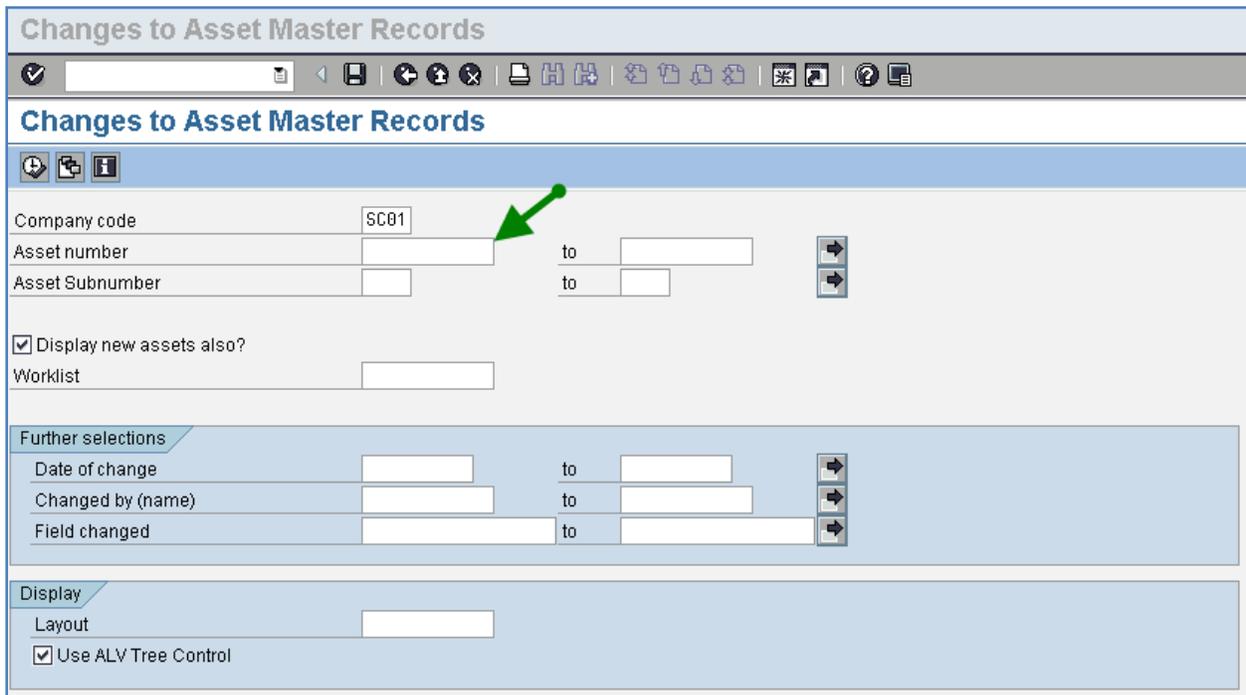

S_ALR_87012037—Changes to Asset Master Record Report

Important Note: This report will only look at the assets in the Business Area of the user.

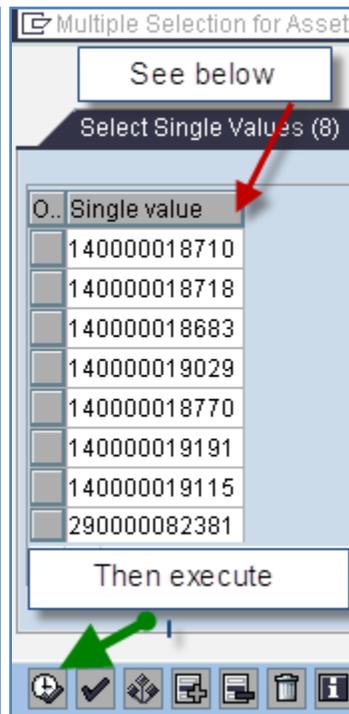

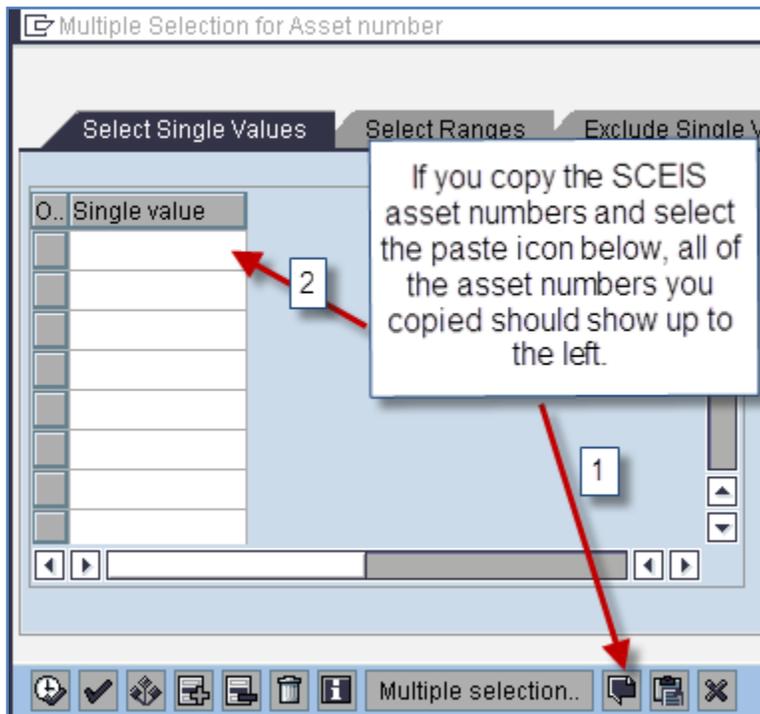

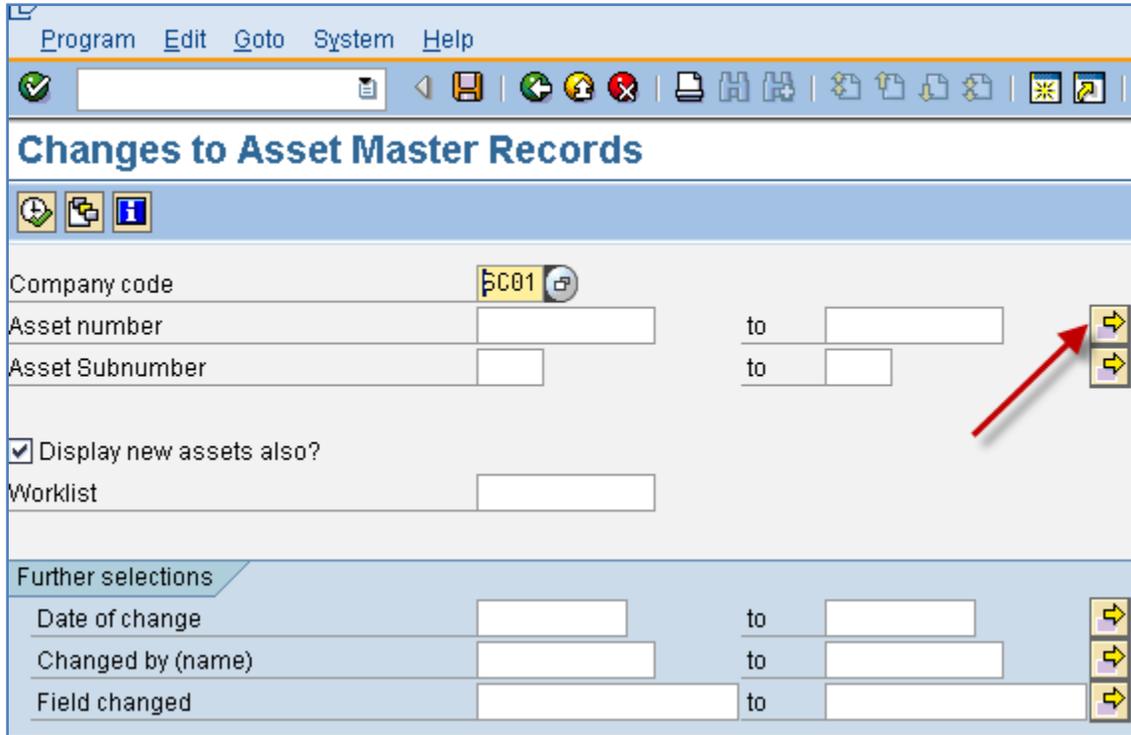

1. To bring up the report, first enter transaction code S_ALR_87012037 into the command field.

2. After you enter the transaction code, you will be taken to the screen below. There are many different ways that you can run the report, however you MUST enter something into the asset fields (indicated with a green arrow in the screen shot below) in order to run it properly.

- a. **Option 1:** Copy a list of asset numbers from the file you are exporting and paste them into the number fields. Click the button to the right of the Asset number fields (indicated with a red arrow in the screen shot below) to open the Multiple Selection for Asset Number screen in which you will paste the numbers.

Instructions for Running New Asset Master Record Report: S_ALR_87012037

To ensure that your report is completed and does not time out, narrow your selection by entering a range of dates as indicated by the lower green arrow in the screenshot below. A good option is to enter the date range during which the IF407 interface was executed.

Changes to Asset Master Records

Company code: SC01

Asset number: 140000018710 to []

Asset Subnumber: [] to []

Display new assets also?
